OUR CAPABILITIES

Are you looking to...

Move it?

Lift it?

Tow it?

Store it?

Stack it?

Safeguard it?

Secure it?

Rack it?

Shift it?

If so, then we can help!

At Backsafe we design custom solutions to ensure your business and life will become easier, safer and ultimately more cost effective.

And with more than 3,000 inventory items to choose from, our team can help lighten the load in the workplace and take the "hard" out of hard work. So whether you are looking to upgrade your existing facilities or move into new premises, our experienced design team can help.

We hold the exclusive Australian sales and distribution rights to workshop equipment brands like

STURGO®

WERKS®

giving us the capability to provide specialised tools to equip you and your team. In addition to a wide product offering, we also provide a consulting service giving advice and inspiration to assist in improving your workplace efficiency and productivity while reducing manual handling risk. We're advocates for innovative warehouse systems, advancing work spaces to become lean, clean, smart and organised. Browse our product guide which has something to suit just about every warehouse, workshop, commercial workspace or retail floor. If we don't stock it, just ask – we design and manufacture to suit your needs.

DID YOU KNOW?

- 90% of serious claims in 2015-16 were due to injury and musculoskeletal disorders. 32% of serious claims were for muscular stress while lifting or handling objects – if we use the right equipment, we can avoid these injuries!
- Median time lost for a serious claim increased by 33%, from 4.2 working weeks to 5.6, from 2000-01 through to 2014-15
- The Health care and social assistance industry accounted for 15% of serious claims in 2015-16, followed by Manufacturing and Construction which accounted for a further 12% of serious claims each. Together, these industries accounted for almost 40% of all serious claims, but less than 30% of the workforce.
- TRADIES: 44% of serious claims were due to traumatic joint injuries
- AGRICULTURE: 12.3% of serious claims occurred from muscular stress while handling objects
- HEALTHCARE: 41% of claims were due to muscular stress while handling objects
(*Facts sourced from the Australian Workers' Compensation Statistics Report 2015-16)

OUR MISSION

Here at Backsafe Australia we will provide you with the best solution for your storage systems, material handling equipment and safety requirements in your workplace.

We will help you overcome inefficiency and unsafe practices by providing a bespoke solution, tailored to your need.

Most of all, we enjoy a challenge; let us tackle yours!

OUR VALUE TO YOU

WE LISTEN

Our ears are not painted on!

INNOVATION

We plan to consistently be at the forefront of the pack.

BLUE SKY THINKING

Our aim is to always go above and beyond your expectation.

CONFIDENCE

With over 30 years' combined experience, the industry runs in our veins.

ACCOUNTABILITY

We guarantee to always be responsible and have an ethical approach in every element of our business.

SHOP WITH CONFIDENCE

SEE SOME OF THE FEEDBACK FROM OUR CLIENTS:

'Thanks ever so much for the prompt receipt. I have appreciated your assistance with processing our request so quickly. Both Vicki and Mary are very happy with their new trolley.' *Names changed for privacy*

'Couldn't be happier! Great product, great service and very prompt and friendly delivery. It's rewarding to know there are still companies like yours operating with integrity. It's a pleasure to deal with you, give my regards to all involved. I'll recommend your company to all I know; thank you again!'

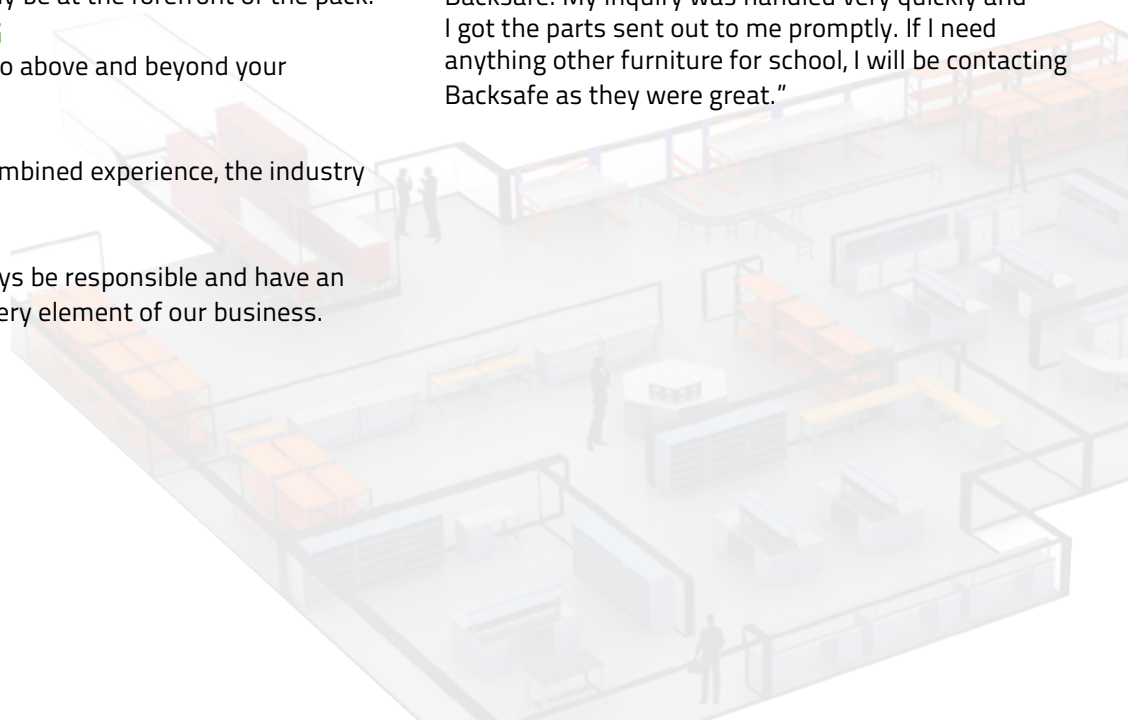

"The cart is amazing! And a fantastic price too. And thank you for your wonderful catalogue we are circulating it around the staff so they can keep all the very handy carts and items in mind. I think the next time we need something like that we shall be in touch directly."

"The cage is great and the wheels you added are awesome; the team is really happy with the product. Thanks for your help."

"The trolley has arrived and we have had another test run with a rack on it. The additional modifications work well. The drop down wheels are no longer wobbly and they work well transiting through the carpark on the gravel. Thanks for all your hard work on this design and for all the effort that went into the visits and modifications. Also, thank you for the calendar."

"Thank you so much, the trolley arrived today and we are using it already! Great service!"

"I was really happy with the service I got from Backsafe. My inquiry was handled very quickly and I got the parts sent out to me promptly. If I need anything other furniture for school, I will be contacting Backsafe as they were great."

STURGO® HOUSEKEEPING TROLLEYS - MANUAL AND ELECTRIC

Sturgo Housekeeping Trolleys are ideal for hospitality, mining camp accommodation and other industrial applications. All models are safe and versatile, have ergonomic rounded handles with no sharp edges, exceptional storage abilities and are compact for storage.

- **Standard Manual Model includes:** vinyl linen bag, bumpers, adjustable middle shelf, vacuum holder and under deck shelf.
- **Standard Electric Model includes:** Rechargeable battery electric 400W motor, locking swivel castors, pneumatic drive wheels, variable speed control, bumpers, battery charger, adjustable middle shelf and vinyl linen bag.
- **E-Trolley Model includes:** vinyl linen bag, bumpers, hand controls, centre drive wheels with 4 swivel wheels, adjustable middle shelf, rechargeable battery electric 400W motor, battery charger, variable speed control.
- **Optional Accessories:** cart doors, additional vinyl bags, broom holders, castor options, trolley covers, ask about modifications. We also supply replacement parts.

Added Benefits of Electric Models:

- Electric models reduce worker fatigue as less effort is required to move the trolleys
- Variable speed controls allow versatility and safety in a range of environments and are adjustable to individual worker requirements
- Long-life and rechargeable battery giving improved performance
- Pneumatic drive wheels handle rough terrain, providing a smooth ride
- Braked rear wheels for parking on unstable surfaces

MANUAL HANDLING IN THE WORKPLACE

Before workers commence their daily tasks, they should always:

1. Identify the hazards – Observe the task, discuss options with colleagues, safety reps and leaders.
2. Assess the risk – What is the risk related to? The environment, force, position or repetitiveness.
3. Control the risk – How can you eliminate or minimise the risk? Isolate it, substitute the mechanical equipment used, wear personal protective equipment, redesign the task or rotate workers between tasks.
4. Review – If the implemented controls are no longer effective or creates new risks, they should be reviewed. Get your safety team involved too.

MANY MANUAL HANDLING RISKS CAN BE OVERCOME BY USING THE CORRECT LIFTING EQUIPMENT AND TECHNIQUES FOR THE TASK AT HAND. HEAVY LOADS THAT CAN'T BE MANAGED SAFELY BY HUMANS, REQUIRE MECHANICAL EFFORTS SUCH AS FORKLIFTS, ELECTRIC PALLET JACKS, LIFTING TABLES, SCISSOR LIFTS, CONVEYORS OR ATTACHMENTS FITTED TO CRANES AND FORKLIFTS. BACKSAFE AUSTRALIA CAN HELP YOU PREVENT MANUAL HANDLING INJURIES BY PROVIDING ADVICE ON WHICH PRODUCTS TO USE FOR YOUR CHALLENGING JOBS. DON'T KNOW WHAT EQUIPMENT TO USE? JUST ASK US!

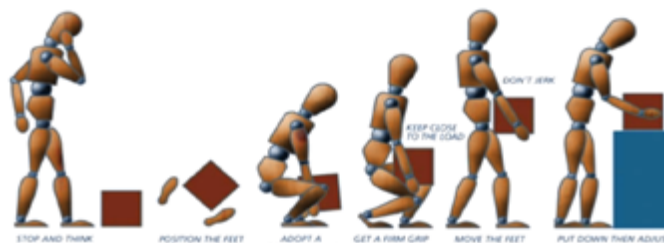

Safety is everyone's Responsibility!

A self-adjusting base in the laundry tubs reduces the need for bending, twisting and reaching during unloading.

A trolley can eliminate many of the risks involved in manual handling, however, the load will still need to be manoeuvred onto the trolley and through the workplace.

WERKS®
PARTITION MODULES

Comes in single or double sided options, as well as your choice of slotted louvre panels, perforated panels or a combination of the two. All components can also be purchased separately. WERKS Modular panels are designed to fit the free-standing module stands shown.

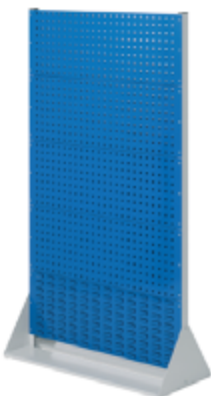

Modular Perforated Panels
H 343 x W 1000 mm

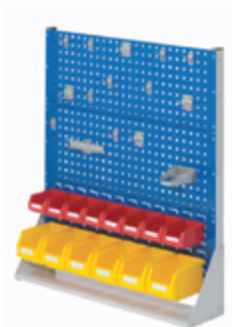

Modular Slotted Panels
H 343 x W 1000 mm

Double-sided module

Single-sided module

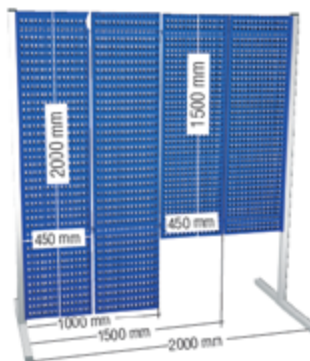

Modular Panels	Sizes	Panels required
Size 2	760mmH x 1000mmW	requires 2 modular panels; or 4 for double-sided module
Size 3	1100mmH x 1000mmW	requires 3 modular panels; or 6 for double-sided module
Size 4	1450mmH x 1000mmW	requires 4 modular panels; or 8 for double-sided module
Size 5	1790mmH x 1000mmW	requires 5 modular panels; or 10 for double-sided module

WERKS®
PARTITION WALLS

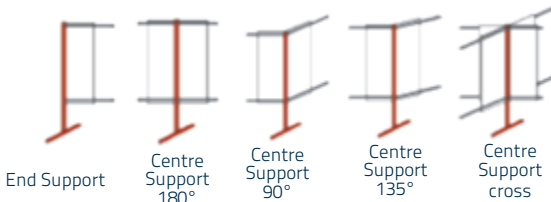

WERKS Partition Walls are a larger scale version of the partition modules. There are many ways possible to configure partition walls due to the variety of column supports available. Partition walls can be used single-sided or double-sided; they are also popular for use as dividing walls for separating workstations.

Panel sizes to suit partition walls are: 1500mmH x 450mmW or 2000mmH x 450mmW
Connecting elements (frames) are supplied in pairs and come in either black or aluminium colour.

For information on sizing, components, accessories or assistance with design, please contact our friendly consultants!

HIGH DENSITY STORAGE CABINETS

High Density Storage Cabinets are extremely versatile and fully customisable storage units designed for convenience and longevity. Backsafe Australia offers an easy order guide with configuration options to choose from or assistance with designing your custom storage solution.

Features:

- Anti-tilt system on all drawers
- Durable steel frame for industrial strength
- Extensive range of sizes, colours and accessories
- Australian-made using quality materials and state of the art technologies
- Maintenance free
- Pair up your storage cabinets with a workbench – see pages 36-40

HOW TO CREATE YOUR HIGH DENSITY STORAGE SYSTEM

Step 1: Select your cabinet size

- Heights range from 660mm to 1485mm
- Depths available are 605mm or 755mm
- Cabinet widths range from 560mm to 1410mm

Step 2: Select the number and size of the drawers

- Drawers should be selected based on the size of the items you intend to store
- Choose from 5 drawer heights: 75mm, 100mm, 150mm, 225mm or 300mm

Step 3: Select your cabinet top

- Create a working surface for the top of your cabinets
- Benchtops available are: Hardwood, Stainless Steel, Tray tops, Rubber mats, Laminate

Step 4: Select the cabinet base

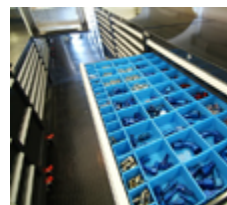

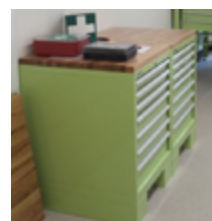

- Supplied standard with adjustable levelling feet
- Optional bases include castors or forklift compatible base

Step 5: Select accessories

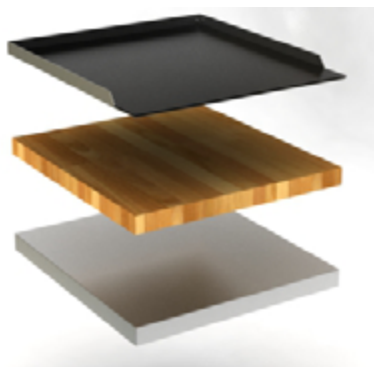

- Choose from a range of accessories for cabinets and drawers, including lock latches, pull handles, steel drawer dividers, drawer partitions, trays, foam inserts, vice mounts and tool supports.

Step 6: Choose your colours

WERKS® PANEL AND TOOL CABINETS

With the WERKS extensive range of cabinets, there is something for every work situation and if there isn't one suitable then we can design one! WERKS cabinets are made from stable sheet steel construction and have an impact and scratch-resistant external coating. All WERKS Cabinets are compatible with the WERKS Tool Holder accessories and floor anchors are an optional accessory.

VERTICAL PANEL CABINETS

are equipped with fully opening vertical panels on telescopic guides, with standard double-sided perforations for hanging tools and other equipment. You can include optional galvanised shelves for versatility and choose from solid, perspex or perforated door panels.

Dimensions: 1950mmH x 1000mmW x 600mmD
Load Capacity: 100kg (evenly spread load) per panel

TOOL CABINETS WITH VERTICAL DRAWERS

are a secure, space-saving solution for clear organisation of tools, powered hand tools and small devices. They feature a larger load capacity of 200kg per drawer (evenly distributed) and are available in single vertical drawer or double vertical drawer options.

Dimensions:
Single Vertical Drawer – 2000mmH x 590mmW x 600mmD
Double Vertical Drawer – 2000mmH x 1100mmW x 600mmD

HEAVY DUTY DRAWER CABINETS (1.65T)

are the toughest of the WERKS cabinet range with a huge total load capacity of 1.65 tonnes. The floor alone can hold 400kg, while the shelves can accommodate 160kg each and the drawers can hold 110kg each (all loads should be evenly distributed). Cabinets can be built with or without a central partition and there are many configurations available. Door options include solid, perforated panel, slotted panel or perspex windows.

Dimensions:
Small cabinet – 1110mmH x 1000mmW x 600mmD
Large Cabinet – 1950mmH x 1000mmW x 600mmD

WERKS® GALVANISED PALLET CAGE

The WERKS Galvanised Cage is a stackable transport and storage cage ideal for production, warehousing and component storage applications. Easily collapsible for space saving during transport, the WERKS Galvanised Cage is assembled without any tools in seconds. This Cage is fitted with a drop down access gate allowing easy access to the base; even when stacked. The WERKS Galvanised Cage can be transported by a Forklift or a Pallet jack, and is suitable for racking or stand alone applications. WERKS Galvanised Pallet Cages are unique on the market with their positive locking bar for pallet racking ensuring no movement.

Features:

- Stackable and Rackable
- 4 way forklift access
- Half fold down gate with two sides
- Sheet Floor
- Note – Lids are sold separately

Model	Height	Width	Depth	Load Capacity	Price
16640019	700 mm	1125 mm	1125 mm	1000 kg	\$400.00

WERKS® PALLET COLLARS

An economical alternative to bulky, unattractive crates and boxes which can be folded down and stored away when not in use.

- Made with pine timber – Premium or economy models available
- Suits standard pallet size
- Collars are made to securely stack on top of each other to create a box or crate around a pallet (only need a small crate, use 1 collar – need a larger crate, add more collars)
- Perfect for transporting pallets of goods
- 4 hinges makes folding for storage effortless
- Minimal storage room required compared to crates and cages

STURGO® GRAVITY CONVEYOR SYSTEMS

STURGO Gravity Conveyors can be customised to suit the working environment as well as the products being carried by the rollers. Larger products may require less rollers per frame as opposed to small products; our consultants can advise the best set up and layout for your needs.

- Blue powder-coated frame
- Adjustable stands from 715-1015mm high
- Ideal for manufacturing, production and mining facilities
- We can design your conveyor layout
- Ask about roller options or belt conveyors!

IMPORTANT

All maximum carrying capacities are based for use on a steel surface, which withstands the pressure of the chain-roller. For safety, the carrying capacities in complete sets are calculated so that 2 Roller Skates could support the full load on uneven surfaces. The track surface is important for the safe transportation of the load, not the carrying capacity of the Roller Skate. Tiles are unsuitable. Movement on tarmac and concrete is restricted. In these cases, it is recommended to put a steel plate of a minimum of 10 mm thickness underneath. Due to the little effort required to overcome the rolling resistance (45-7% of the total load) precautionary measures must be taken for the use on inclined surfaces.

STURGO® HEAVY DUTY FURNITURE MOVERS

- For professional transport of heavyweight items.
- Ideal for delivery, removal, maintenance and assembly applications.
- For switch cupboards, safes, containers and machinery.
- Sold only as a set: Including two transport unit with hydraulic lift and built-in securing straps. Strap length 5 meters. Steering handles for direct wheel control. Load is easily transported and exactly positioned.
- Operation: Position lifting plates underneath item to be moved, Tension securing straps. Lift item on both sides to equal height and move.
- Technical specification: Support rails with protective covering. Powder coated finish. Heavy duty wheels with ball bearings. Non-marking polyurethane wheel suitable for carpeted flooring.

ANTI-SLIP AND ANTI-FATIGUE MATTING

Industrial matting is designed for comfort, durability and to promote productivity. With a design suited to most industries, you can help prevent injuries in the workplace by reducing worker fatigue (thereby improving productivity) and reducing the risk of slip and trip hazards.

Engineers Mat:

- Elevated rib design provides maximum traction reducing 'time off injuries'.
- Large hole gives good drainage and allows swarf and weld spatter to fall through.
- 25mm thick heavy duty abrasion resistant rubber.
- Heavy duty design aims to keep your plant cleaner and safer.
- Large 50mm yellow safety border provides a visible non-slip edge

Model	Standard Size	Border	Price
10660012	1000 mm (W) X 1500 mm (L)	Yellow	\$206.00

OptiMat:

- Superior matrix design allows drainage of water, oil and general debris.
- 50mm enlarged ramp reduces slips, trips and falls.
- Underside suction cup profile provides anti-fatigue cushioning and holds mat firmly in place.
- Highly formulated rubber stops hardening and cracking over time.
- Uniquely designed for easy cleaning.

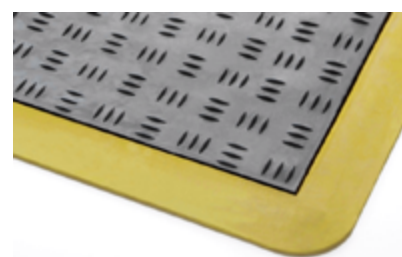

Model	Standard Size	Border	Price
14440131	900mm (W) x 1500mm (L)	Black	\$197.00

UltiMat:

- Comfortable and durable drainage mat is lightweight with a slim profile.
- Unique design allows for drainage of water and accumulated debris.
- Raised grip points increase traction in oily or wet conditions.
- Highly formulated rubber stops hardening and cracking over time.
- Unique design reduces down time, increasing profitability.

Model	Standard Size	Border	Price
14440095	900mm (W) x 1500mm (L)	Black	\$163.00

EuroMat:

- Non-slip checker plate pattern, looks great and offers a non-slip easy to clean surface.
- Heavy duty rubber with optional greaseproof formula that will stand the test of time
- Underside suction cup design, increases traction to painted and slippery surfaces.
- Flat top designs for those who may have identified potential 'foot roll'.
- Increase worker awareness and productivity.
- Large 50mm yellow safety border provides a visible non-slip edge.

Model	Standard Size	Border	Price
14440040	900mm (W) x 1200mm (L)	Black	\$154.00
14440062	900mm(W) x 1200mm(L)	Yellow	\$173.00

ErgoTred Mat:

- Domed surface design to create comfortable working environment by reducing strain.
- Air cushioned design relieves stress and increases circulation.
- Heavy duty construction in quality rubber that will not harden overtime.

Model	Standard Size	Border	Price
14440109	900mm (W) x 1200mm (L)	Black	\$136.00
14440114	900mm (W) x 1200mm (L)	Yellow	\$148.00
14440110	600mm(W) x 900mm(L)	Black	\$70.00
10660019	600mm(W) x 900mm(L)	Yellow	\$78.00

RAISED STORAGE PLATFORMS MEZZANINE FLOORS

Installing a Mezzanine in your warehouse, garage or factory, can double your usable floor space and increase the functionality of your business. Backsafe freestanding, custom-designed mezzanine floors are not only cost effective, but also incredibly fast to install. If you have outgrown your existing space, or simply need to de-clutter your valuable work area, a Backsafe mezzanine floor could be the solution for you.

MINIMUM DOWNTIME = MAXIMUM CONVENIENCE

The components of the Backsafe mezzanine floors are manufactured in our workshop and then assembled onsite. This process results in minimum downtime and disruption to your workplace, with most mezzanines installed within 1-2 days! Our floors are all OH&S compliant and certified for loading. The structures are steel fabricated with a timber floor (either termite treated or ply) with a fully welded steel staircase.

FREESTANDING... RELOCATABLE

Backsafe mezzanine floors are freestanding, therefore they are also demountable and relocatable. The floors are designed with minimum posts to create maximum clear, uncluttered work or storage area underneath. They are engineered to suit your needs in size, shape and load.

- Freestanding
- Relocatable
- Custom built to your needs
- OH&S compliant

DESIGNED TO SUIT ANY SPACE AND ANY BUSINESS

Backsafe mezzanine floors can be customised to suit any building shape and business operation. We can custom design a floor to suit your open space, or to fit over the top of equipment or other structures in your warehouse. We can also add to your existing mezzanine ...the possibilities are endless..

LEANER, CLEANER, SMARTER!

Backsafe Australia is committed to providing safer work environments because we believe in getting your team 'back safe' at the end of each day! One of the ways we help businesses do this, is by assisting with the design and implementation of LEAN systems! You can see some of our projects on our website – including the Prospector Maintenance Depot in Perth where we implemented the LEAN principles to improve storage and organisation.

THE 5S LEAN PRINCIPLE:

- **SORT** the clutter in your workspace. Remove what is not needed.
- **SET IN ORDER** or organise the remaining items, taking into account the frequency of use.
- **SHINE** or clean the area thoroughly, including floors and equipment.
- **STANDARDISE** the method used to sort, organise and clean.
- **SUSTAIN** your new lean, clean workplace by making it part of your workplace culture!

The following products can assist in starting the LEAN journey in your workplace:

- Boscotek Heavy Duty Workbenches – Refer pages 36-37
- WERKS High Capacity and Heavy Duty Cabinets - Refer page 44
- WERKS Perforated and Slotted Louvre Panel Systems (Shadow Boards, Trolleys, Tool Holders) – Refer pages 32-35
- WERKS Drawer and Tool Cabinets – Refer page 45
- Boscotek High Density Storage Cabinets – Refer pages 42-43
- Customised Tool Trolleys – Refer page 30
- Mezzanine Floors – Refer page 94

Before LEAN

After LEAN

LEAN workplaces are tidy, organised, light and bright; they improve work productivity, efficiency and the motivation of workers while reducing hazards and injuries. The overall effect on your business performance can be improved by simply taking time to implement LEAN principles.

Why not speak to our consultants to see how we can help your business achieve great results?

We love challenges!
