

# Pallet Racking

**Frame Protectors**

**Retaining Pins**

## Usage

Pallet Racking is a complete storage solution for all environments where goods need to be stored on pallets! Improve your productivity, access to goods and storage capacity with a system designed to your needs.

- Frame protectors help to prevent damage to racking uprights from forklifts and other equipment
- Easily accessible with forklifts, pallet jacks and other picking equipment

## Features & Benefits

- Engineered and certified to AS4084-2012
- Design and installation available
- Beam retaining pin system ensures beams aren't accidentally dislodged
- Safe Working Load Signs provided
- Optional Hot Dipped Galvanised racking available
- Deck options including steel mesh or timber shelves; mesh backing can also be fitted to prevent goods falling down the back of the racking

**Mesh Backing**

**Load Signage**

**BACKSAFE**
