Step-Thru

StockMaster Step-Thru is an all terrain, safe and easy to use Mobile Step-Way Ladder

With two large diameter wheels Step-Thru moves easily over sealed or unsealed surfaces and slopes making it ideal for indoor or outdoor use.
Featuring just one control it is fast and easy to move around. Taking hold of the control raises the unit to the mobile position and provides positive easy steering to move to the job. Release of the control automatically returns Step-Thru to the stationary mode where it is braked and totally stable.

A stable step of platform creates a much safer product

The dangerous practice of climbing onto and jumping down from trucks, or the use of step ladders to access containers, mezzanine floors and similar situations is eliminated, significantly reducing the risk of accident. With a stable stepping off platform and two side safety rails to maintain a firm hand hold, access to the work place is safe and easy.

Step–Thru substantially reduces your exposure to the high cost of lost time injuries and compensation claims.

StockMaster Step-Thru is manufactured from high quality materials and built to last. With reasonable care it will provide many years of service, and continue to provide safe access to the workplace.

StockMaster Step-Thru Mobile Step-Ways . . .

- ✔ Provide safe, mobile access
- ✔ Enable a three point contact at all times
- ✔ Move easily over sealed or unsealed surfaces
- ✔ Move quickly and easily to where you need them
